No more expensive budgets. Or the need for motion capture studios. REALVIZ Movimento offers you affordability, flexibility and ease of use, adding more value to your productions.

If you're a graphic artist, designer, architect, VFX supervisor, CG Technical Director, or simply just someone with an interest in video or digital content development, we invite you to join us and find out more!

REALVIZ Movimento is a new software which captures the motion of non-rigid objects from multiple (2 or more) image sequences. Movimento is a state-of-the-art video-based motion capture solution "Powered by SMART", REALVIZ' powerful automatic tracking engine. It offers users a complete and flexible solution for facial, hand, arm and full-body motion capture across a wide range of applications, from special effects to behavioral analysis amongst many others. Movimento also offers users the possibility to combine matchmoving (3D camera tracking) and motion capture processes for rapid on-set mocap.

Organized by Click Grafix Sdn Bhd

Unit 110, Block B, Phileo Damansara 1, 9 Jalan 16/11, Off Jalan Damansara, 46350 Petaling Jaya, Selangor.
